

VigiOne New Features Coverage

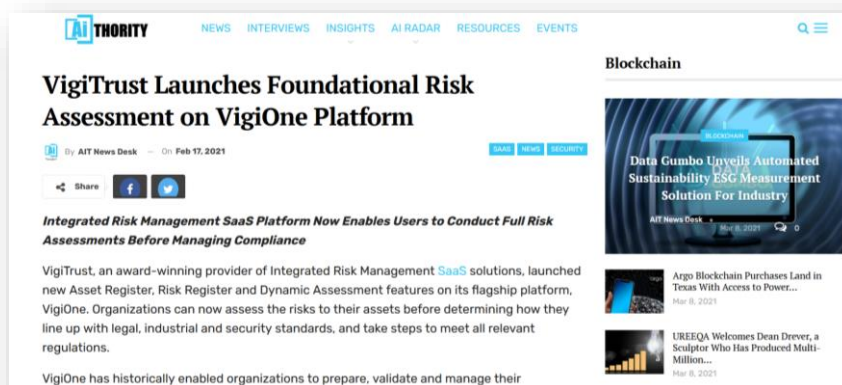

(Updated on 08/03/2021)

VigiTrust have recently added 3 new features to the VigiOne solution which make assessments even easier:

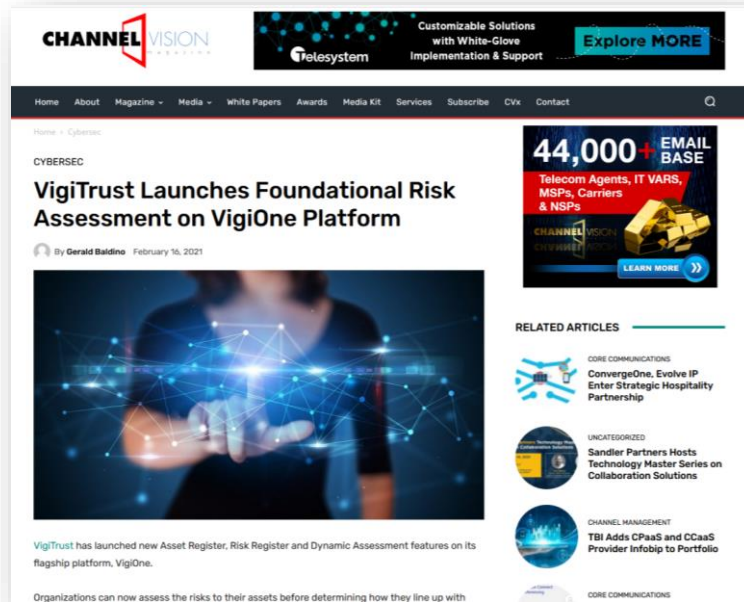

- **Asset Register:** Enables users to register all company assets, from physical security and IT systems to processes, reputation and IP, and assign responsibility for each; companies can also integrate existing asset registers into the VigiOne platform.
- **Risk Register:** Users classify each threat, vulnerability and impact level, and VigiOne automatically calculates a risk score by domain – also allows organizations to incorporate inherent risk levels for each asset and to apply risk treatment controls to result in residual risk per asset.
- **Dynamic Assessment:** Manages asset templates, including pre-existing templates for each standard and regulation, and provides a tool for organizations to create their own assessments which can be automatically or manually mapped to and tracked against all existing regulations.

New features coverage:

Palo Alto Networks to acquire Bridgecrew. Red Canary secures \$81 million in Series C funding. Quad9 moves to Switzerland.

SUMMARY

By the CyberWire staff

At a glance.

- Palo Alto Networks to acquire Bridgecrew.
- Red Canary secures \$81 million in Series C funding.
- Quad9 moves to Switzerland.

Mergers and acquisitions.

Palo Alto Networks will acquire **Bridgecrew Technologies**, a DevSecOps startup based in San Francisco and Israel, for \$156 million, **CRN reports**. The company stated, "The proposed acquisition will enable Prisma Cloud to provide developers with security assessment and enforcement capabilities throughout the DevOps process... Bridgecrew co-founders, Idan Tendler, Barak Schoster and Guy Eisenkot, and their teams will join Palo Alto Networks."

Hardware security module (HSM) company **HUB Security** is merging with software security firm **Advanced Logistics Development (ALD)**, **Geektime reports**. Geektime states, "Both companies see the advantage behind the merger with HUB Security's technological innovation paired with ALD's global sales infrastructure and network of market-leading clientele. HUB reports that institutional investors have pledged around \$65 million upon completion of the merger. According to the terms of the deal, once completed, Hub will control 51% of the board of the newly merged company - which should see a post money valuation of \$145 million."

New York-headquartered security monitoring company **Datadog** is acquiring **Sqreen**, an application security management startup based in Paris and San Francisco. Datadog stated, "The addition of Sqreen's application security capabilities will provide development, security and operations teams a unified platform to deliver and manage secure and resilient applications."

London-based private equity group **Apax Partners** is acquiring Canadian managed security service provider **Herjavec**

At the bottom right, there is a 'SPONSORS' section featuring Navicat Premium.

Vigistrust Vigione now enables users to conduct full risk assessments before managing compliance

Vigistrust launched new Asset Register, Risk Register and Dynamic Assessment features on its flagship platform, Vigione. Organizations can now assess the risks to their assets before determining how they line up with legal, industrial and security standards, and take steps to meet all relevant regulations.

Vigione has historically enabled organizations to prepare, validate and manage their compliance with security and data protection standards and regulations through its continuous monitoring, assessments, eLearning, audit and reporting functions.

The platform now expands its reach to cover the steps before compliance management: namely, answering the questions, "What are the risks my organization faces, and what can I do about those risks?" to help create a Continuous Compliance Program.

The new tools include:

- **Asset register:** Enables users to register all company assets, from physical security and IT systems to processes, reputation and IP, and assign responsibility for each; companies can also integrate existing asset registers into the Vigione platform
- **Risk register:** Users classify each threat, vulnerability and impact level, and

The screenshot shows a web page from Security Boulevard. At the top, there is a navigation bar with the site logo and various menu items. The main content area features a headline: "Vigistrust Launches Foundational Risk Assessment on Vigione Platform" by Deb Schalm on February 16, 2021. Below the headline is a sub-headline: "Integrated Risk Management SaaS Platform Now Enables Users to Conduct Full Risk Assessments Before Managing Compliance". The article text begins with "New York, NY, February 16, 2021 - Vigistrust, an award-winning provider of Integrated Risk Management SaaS solutions, today launched new Asset Register, Risk Register and Dynamic Assessment features on its flagship platform, Vigione. Organizations can now assess the risks to their assets before determining how they line up with legal, industrial and security standards, and take steps to meet all relevant regulations." There is a call-to-action box for "Register Today! Cybersecurity 2021: The New Normal" with a "Register Now" button. On the right side, there is a "TechStrong TV - Live" section with a video player showing two speakers. Below that is a "Subscribe to our Newsletters" section with a form for "Your Email" and a "Subscribe Now" button. At the bottom right, there is a "Most Read on the Boulevard" section.
