CYBER CHECKMATE 2024
Security Strategies on the Digital Chessboard

Welcome!

In 1986 as I was discovering early computing at school in France, my father, an avid chess player, was introducing me to a revolutionary way of improving my chess game: The Kasparov Chess Computer Mark12.

This was one of my first encounters with portable electronic "clever" equipment as you could play virtually anywhere AA batteries would allow you to. I was thinking about it recently and it made me wonder if everything in cyber is a akin to a game of chess!

Indeed, chess is about rules of engagement, perimeter, hierarchy, moves and mostly strategy! This year the VigiTrust Global Advisory Board is focusing on cyber security & compliance strategy. As always expect groundbreaking and provocative keynotes, interactive panels, open brainstorming sessions and inspirational debates not forgetting amazing networking.

On behalf of the whole VigiTrust Global Advisory team and myself, we look forward to seeing you in Dublin.

Mathieu Gorge

VigiTrust Global Advisory Board Chairman
